

## New Drawing Class Starts Saturday, January 17, 10:00-12:00

This is a hands-on series of classes. We will be drawing, evaluating and discussing the problems involved, and looking at solutions to help us get the results we are looking for, and to hopefully come to understand the important relationship between observation and drawing practice. All levels of experience are welcome.

# DRAWING WHAT YOU SEE

A BASIC DRAWING CLASS  
FOR BEGINNING AND INTERMEDIATE STUDENTS

### **Sat. January 17—Class 1: Drawing**

**the Line**—Introduction and exercises highlighting the importance of precision and relationships of line, the basic mark of drawing.

**Sat. January 24—Class 2: Seeing and Drawing What We See** Understanding what we see and simplifying the subject with basic shapes.

**Sat. January 31—Class 3: Shapes in Space** How we draw shapes to show distance and the conventions we use to make it convincing to the eye.

**Sat. February 7—Class 4: The Third Dimension** How we draw basic three dimensional shapes and an introduction to basic perspective.

**Sat. February 14—Class 5: Light and Shadow** How we use shading to show the effects of light on objects and to suggest distance.

**Sat. February 21—Class 6: Putting It All Together** How we combine all these elements to draw a convincing image either from real life observation or from the imagination.

**Supplies needed:** 3 or 4 number 4B or number 6B pencils, a kneaded eraser, 11x14" drawing pad (or larger if preferred), a stiff drawing board larger than 11x14 for a backing to draw on.
